AMENDMENTS TO THE SPECIFICATION:

Page 3, replace paragraph 2, as follows:

~~Referring to~~ FIGS. 1, 2 and 3, ~~which show~~ shows one embodiment of the present invention preferably installed below a chair cushion seat, and is described hereinafter. A buffer 1 is assembled from structural elements comprising a central shaft 11, a torsion spring 12, a buffer chamber 13, a reposition spring 14 and a spring collar 15, wherein the torsion spring 12 is configured on the outer edge of the central shaft 11. The central shaft 11 and the torsion spring 12 are ~~together~~ disposed together in the buffer chamber 13. A fixing mount 131 of one end of the buffer chamber 13 is enabled to bolt to a chair-bac k using a screw bolt, securely fixing thereof. Another end of the buffer chamber 13 is connected to the reposition spring 14, and another end of the reposition spring 14 engages with the spring collar 15. Securing lugs 151 of one end of the spring collar 15 bonds to a chair cushion frame thereof. ~~The present invention is characterized in having:~~
